

# **5 Best WooCommerce Dropshipping Plugins For AliExpress Marketplace**

## **5 Best WooCommerce Dropshipping Plugins**

For AliExpress  
Marketplace

Nowadays you can see the number of online stores are increasing over the internet. This is because entrepreneurs have found it as a profitable business and also it is easy to set up. There are a lot of eCommerce software available on the market that allows you to start, run, and manage your online store easily. But do you know that there is another business idea that lies in the eCommerce industry only to make more profits? Yes,

you guessed it right! I'm talking about starting and running a dropshipping business.

While WooCommerce is a perfect plugin for building an e-store, it lacks features and functionalities for launching a dropshipping business. That's why certain developers have come up with a few feature-rich dropshipping plugins that will help you launch a dropshipping business quickly. The main highlight of this business format is that you don't have to keep your sellable products in your warehouse instead you can sell it directly from other vendors. This saves on your business expenses that results in more profits.

So, let's understand what this dropshipping is, how it works and more importantly, what plugins you can use to start off a dropshipping business. But before you take a look at those WooCommerce plugins, I want you to solely focus on [our website design Los Angeles company](#) that offers multiple services to grow small and medium sized businesses. Our team of SFWPExperts help you improve your website design, drive more traffic to your site, and boost your overall conversions through professional eCommerce web design, landing page design, web development, SEO, and online marketing.

With that out of the way, let's jump right into dropshipping and see what it is.

## **What is Dropshipping?**

Dropshipping is an online business idea in which eCommerce stores sell products to their customers not directly but indirectly. That means they don't store the sellable products but fulfill customers' orders through a third-party vendor. They purchase the products from them that their customers want and then direct them to ship that product directly to their customer.

This method cuts their cost of running a business and thus they make higher profits. The growing implementation of this eCommerce business idea has made dropshipping a popular choice for many entrepreneurs who want to make money online.

In case you doubt how a vendor sells their products in this way, I must tell you that there are several platforms where you can find such vendors who are willing to collaborate with you for dropshipping. They remain ready to ship their products purchased by you to your customers' address whenever you want. This makes it quite easy to run your dropshipping business on the online platform.

What's more, you can also get your products delivered to your customers with your own branding and packaging to build your brand image. Third-party vendors don't mind doing this for you and they easily agree to work according to your instructions.

If you want to create a gorgeous looking design for your product packaging, you can get into conversation with [our innovative Wordpress website design company](#) now.

Now let's see what WooCommerce plugins you can use to specifically create your own dropshipping store with AliExpress. The below mentioned plugins will help you to connect your WooCommerce store to AliExpress nicely, after which you can automatically import products, sync prices, and fulfill your customer's order.

## **Top 5 WooCommerce Dropshipping Plugins For AliExpress**

### **1. AliDropship**

AliDropship is a widely used AliExpress dropshipping plugin that lets you do multiple things in one plan.

With this plugin you can:

- Easily import a wide variety of products from AliExpress
- Fully control the prices of your store products
- Automatically fulfill your customers' order without human intervention
- Easily make updates to your product information through automated syncing

Take note that this plugin can work independently with just Vanilla WordPress install, but if you want to take advantage of all other WooCommerce plugins it's better to choose the WooCommerce version.

On the pricing front, AliDropship is a little bit expensive tool where you have to make just a single payment to get its license. You might think that you have to make a higher initial investment to start your dropshipping store but then you won't need to pay a fixed amount every month.

Price: Alone this plugin will cost you \$89, but if you want to have a pre-built store for your dropshipping business, you will have to pay \$299 or more.

In case you want your potential customers to go through an awesome shopping journey on your site, you can connect with our Los Angeles web design company to create it.

## **2. Dropified**

Dropified is another dropshipping plugin on this list which works seamlessly with Shopify and WooCommerce applications. The speciality of this plugin is that it allows you to import products from AliExpress to your WooCommerce store within just a few clicks. In addition to that, it also offers a Chrome extension that helps you to obtain the AliExpress products effortlessly.

Dropified, apart from fulfilling your customers product requirement, it also ensures that all the details of your products are absolutely correct. For example, they take care of your price change and product availability by automatically syncing both platforms.

What also you get this WooCommerce plugin is an in-app photo editing feature and over 30 different vendors support in case you would like to explore other marketplaces other than AliExpress.

Price: This plugin offers a 14-day free trial to all users, but after that you will have to buy its plan starting at \$39 per month. Keep in mind that the payment for this plan has to be made annually only, not monthly.

If you would like to give your customers an amazing viewing experience on your WooCommerce site, you can ask creative designers of our [SFWPExperts](#) to redesign your site.
